

BlockSecure Audits - Smart Contract Audit Report

Audit Summary

Token Name: CoinXi

Audit Date: April 14, 2025

Audit Status: Passed

Risk Level: Very Low Risk

This smart contract has undergone a professional security audit conducted by BlockSecure Audits. The overall design, implementation, and access controls were found to follow industry best practices with very low risk detected during assessment.

Technical Review

- Ownership: Properly implemented using Ownable pattern. Owner-only functions are protected.
- Minting: Controlled access to minting, no unbounded mint.
- Burning: Standard burn function included, safe implementation.
- Pausable: Integrated correctly. Critical functions can be paused by the owner in emergencies.
- External Calls: No external untrusted contract interactions.
- No reentrancy points found.

Audit Conclusion

The CoinXi contract has passed the audit successfully with no critical or high-risk vulnerabilities identified. Only minor observations were made which do not pose significant risk.

Security Status: PASSED

Overall Risk: VERY LOW
