COINXI TOKEN AUDIT

AUDIT REPORT

CONTRACT DETAILS

Overview	CoinXi (\$OXI) ERC-20 token
Framework	OpenZeppelin Contracts 5.0.2
Owner	Yes (Ownable)

SECURITY ASSESSMENT

Reentrancy	Low
Overflow/Underflow	Low
Front-Running	Low
Access Control	Low

April 14, 2025

J. Smith

Security Analysis Summary

This audit report presents the results of the security analysis performed on the CoinXi (\$OXI) smart contract. The goal of this audit was to identify vulnerabilities, security issues, and adherence to best practices.

Key Findings:

- Reentrancy: No vulnerability detected.
- Integer Overflow/Underflow: Secure, due to Solidity $\geq 0.8.0$.
- Front-Running: No sensitive functions exposed to front-running.
- Access Control: Proper ownership implementation using OpenZeppelin's Ownable.

Conclusion:

The CoinXi smart contract has passed all basic security checks with low risk in all evaluated categories. It follows best development practices and is ready for deployment.
